World Leaders In Automotive Key Programming Equipment

Truck Key Programming System

The portable AD100Pro Truck key programming tool programs keys and remotes for truck systems worldwide. The AD100Pro Truck is a truly unique product supporting most truck manufacturers worldwide. Advanced Diagnostics offers key programming solutions, that bypass the franchised dealer networks, which means an alternative key programming service can be provided to commercial vehicle operators by professional auto locksmiths and auto-technicians for drivers on the roadside or whenever required.

The use of transponders in truck keys means that whenever additional / replacement keys or remotes are required, they must be programmed into the truck using specialist diagnostic equipment. Originally, if a customer needed additional or replacement keys / remotes, they would have no option but to go to the franchised dealer, which could be expensive and inconvenient for commercial drivers. For truck operators, the most important requirement is to get the truck back on the road quickly, as time is money, The AD100Pro Truck is the market leading tool designed and manufactured in the UK by Advanced Diagnostics and offers truck owners an alternative to the franchised dealer, and can generate an excellent return on investment by providing an additional income stream for your business.

Advanced Technology Integrated

Designed with simplicity in mind and advanced technology integrated, the AD100Pro Truck is easy to use and simply guides you through various processes for key and remote programming. Most truck Immobiliser systems require security access (Pin Code) to allow keys / remotes to be programmed. The AD100Pro Truck can read many Pin Codes and where they cannot be read, Advanced Diagnostics also offer a service to customers to obtain Pin Codes online via the website.

Providing a high quality, cost effective, and valuable service for drivers has never been easier - and it's clear to see why the AD100Pro Truck is the number one choice for auto locksmiths and auto technicians, enabling them to gain access to leading edge technology at a competitive cost.

Software For Vans & Trucks

The AD100Pro Truck comes pre-loaded with software for vans and smaller commercial vehicles operating on 12v systems, as part of the standard kit. Additional software modules covering all the major truck manufacturers is available, and can be purchased as required and downloaded easily online direct on to the AD100Pro Truck, 24hrs a day.

Protecting Your Investment

Copied by many, mastered by one, Advanced Diagnostics are pioneers and a trusted name in the key programming market. Security for the AD100Pro Truck is built-in, ensuring full protection for your investment. Additional security is provided by a smart card and calculator which works in a similar way to the security devices used by the banking industry. AD100Pro Truck is the popular choice for auto locksmiths and garages worldwide, enabling access to the most advanced key programming technology at a competitive cost. Be part of this exciting & lucrative market too, by offering commercial drivers a quality mobile key programming service.

"We rely on AD Pro Series Programmers because AD has continued to lead the industry with new software that allows us to program more vehicles. The products we have purchased from Advanced Diagnostics are well made, reliable, durable and easy to use."
