LISHIPRO Backgrounds:

Continuing the legacy of Mr Li, the inventor of Lishi tools, LISHIPRO builds on our established product portfolio, bringing innovative solutions to meet the evolving needs of the locksmith industry.

The LISHIPRO range offers:

- Specialised Solutions – Purpose-built tools for emerging automotive, residential and commercial applications
- Responsive Production – Small batch, limited production tailored to customer requirements and market demands
- Faster Innovation – Greater flexibility to develop new tools in response to the evolving needs of the locksmith industry
- Industry Collaboration – Cooperate with selected premium partners for material and manufacturing advancements.

HU162-10-PRO V1: A supplemental to HU162-SC10-V2

Tool Name: HU162-10-PRO V1

Version: 1.0

Release date: 20th of October, 2026

Production Type: Supplement to original Lishi tool, small batch, limited release

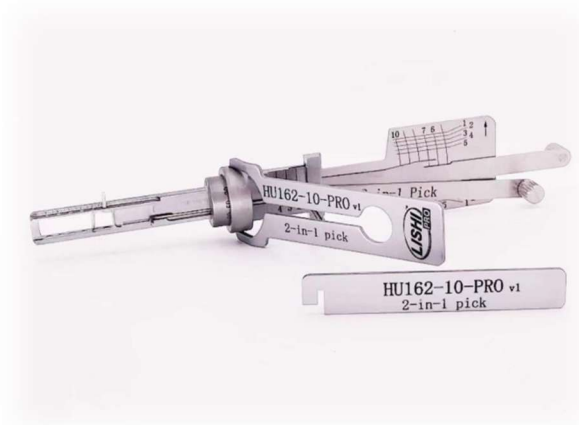

Technical details:

This HU162-10-V1.0 is designed to overcome some specific issues encountered when working on some late models of VAG vehicles, such as Audi Q5 FY generation with recessed key hole, the existing production tool HU162-SC10-V2 has difficulty to operate both swing lifters for side cuts 1~4. This HU162-10-PRO-V1.0 has extended sidecut lifters to allow operating away from key hole.

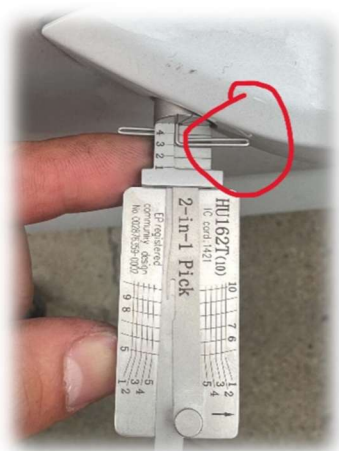

Technical Notes:

When operate on these late models of Audi Q5 FY generation or alike, the default tension bar needs to be removed and a separate tension piece fitted to the top of tool panel, a mild tension is suggested when applying tension by this tension piece to avoid breakage and damage.

Tool Photo:

HU162-SC10-V2 issue: swing lifters collide with door handle

Application Sample Photo:

The extended swing lifters avoid the collide with key hole, and allow smooth operation.
