

# KEYLINE BREAKING NEWS

## NEW VOLVO KIT!

**The new Volvo Kit confirms Keyline's leadership in automotive key duplication.**

An exclusive product right after another, for Keyline - Innovators by Design: just a few weeks after the worldwide launch of the BM100KIT for BMW Keyless systems, here's a new, ground-breaking progress in automotive market innovation.

Thanks to the well-established TK100 technology, the first and only universal electronic head, Keyline widens the latest new frontier of keyless systems.

Today the Volvo Kit gives you the possibility to duplicate the Volvo Keyless system.

Only Keyline gives to its customers the Volvo Kit: the new VL100 fob, the VL22P key and a practical keyring.
