LISHIPRO Backgrounds:

Continuing the legacy of Mr Li, the inventor of Lishi tools, LISHIPRO builds on our established product portfolio, bringing innovative solutions to meet the evolving needs of the locksmith industry.

The LISHIPRO range offers:

- Specialised Solutions – Purpose-built tools for emerging automotive, residential and commercial applications
- Responsive Production – Small batch, limited production tailored to customer requirements and market demands
- Faster Innovation – Greater flexibility to develop new tools in response to the evolving needs of the locksmith industry
- Industry Collaboration – Cooperate with selected premium partners for material and manufacturing advancements.

NSN14-LEAF-2026 V1: A supplement to NSN14 Lishi

Tool Name: NSN14-LEAF-2026

Version: 1.0

Release date: 20th of October, 2026

Production Type: supplement to original production, small batch, limited release

Technical details:

This NSN14-Leaf-2026-PRO V1 is designed to overcome the access issues encountered on Nissan Leaf 2026 with concealed key hole, Not only the length of original NSN14 Lishi tool needs to be shortened, the height of panel and the shoulder are also greatly reduced. An external tension piece is made to slide on panel for operation.

Technical Notes:

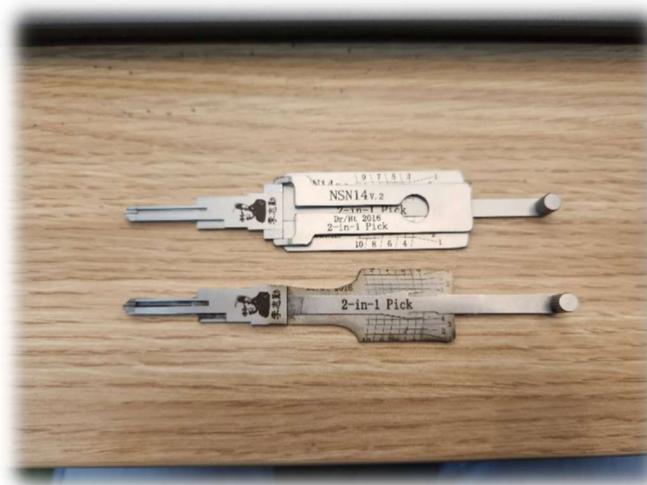

Due to the limited space between pulled handle and key hole, the tension piece is mounted on the back of main panel, mild tension is recommended to avoid breakage and damage.

Tool Photo:**Nissan LEAF 2026**

Key hole is concealed from door handle

NSN14 issue: production NSN14 Lishi needs to be trimmed down

Application Sample Photo:

Wedge the door handle open, insert tool fully and separate tension piece slides into the back of panel for tension operation, please use mild tension to avoid breakage and damage.
