Renault*, Dacia*, Kia*, Hyundai* Cloning Solution

The first worldwide solution for cloning ID49-1E Renault*, Dacia* and latest generation 7K & 6K Kia* Hyundai* models

Renault*, Dacia*, Kia*, Hyundai* Cloning Solution

The first worldwide solution for cloning ID49-1E Renault*, Dacia* and latest generation 7K & 6K Kia* Hyundai* models

Reliable, familiar process
Clone Renault*, Dacia*, Kia* and Hyundai* models with the RW5 or Smart Aerial+ in exactly the same, familiar way you clone other vehicle keys.

Free software update
The solution is available with a free, automatic software update for RW5 and Smart Aerial+.

Fast cloning
The cloning calculation is made via cloud using Silca's powerful, proprietary servers.

Extends capability of the RW5 and Smart Aerial+
The cloning solution is available only with the RW5 and Smart Aerial+ and with the Silca GTI Pro and UTX-S transponders.

NEW R-Snoop
For Renault* and Dacia* models, the new R-Snoop is needed to detect data directly from the car immobilizer unit even when using the Smart Aerial+. Cloning Kia* and Hyundai* does not require use of the R-Snoop.

Universal use
The R-Snoop can be used to clone all the applications covered by existing Silca Snoop devices.

Application list in constant evolution
The solution does not cover all technologies. Feedback on vehicle clonability is given at the start of the cloning process.
